SUMMARY

A fourth-year Computer Science student at Ontario Tech University with a strong interest in software development, problem-solving, and continuous learning. Passionate about building projects that combine practical utility with technical depth, and motivated by curiosity-driven exploration across diverse fields. Outside of academics, enjoys reading and playing chess, which further strengthen analytical thinking and strategic reasoning skills.

EXPERIENCE

Teaching Assistant

United Christian College

July 2023 - August 2023, Hong Kong, Kowloon East

- Assisted lead teachers in classroom instruction for English lessons, supporting students with reading, writing, and comprehension activities.
- Provided one-on-one and small group support to help students better understand grammar, vocabulary, and assigned tasks.
- Helped prepare classroom materials, worksheets, and learning resources to support lesson delivery.

Event Coordinator

Ryze Hong Kong (Sky Zone franchise trampoline park)

May 2023 - August 2023, Hong Kong

- Coordinated and hosted birthday parties and group events at Ryze Trampoline Park, ensuring smooth execution from start to finish.
- Resolved scheduling and on-site event conflicts efficiently to maintain a positive customer experience.
- Managed customer inquiries and provided clear information regarding bookings, packages, and event details.
- Guided guests through event areas and ensured proper setup and readiness of designated party spaces.

PROJECT

Robotics Ball Detection

github.com/KureYv/Ball-Detection • April 2026 - April 2026

- Developed and implemented a computer vision-based ball detection system for real-time object tracking.
- Processed and analyzed video frames to identify and localize a ball using image processing techniques.
- Applied filtering and detection algorithms to improve accuracy and reduce false positives in varying conditions.

Large language model Calendar

github.com/georgenakuje/Mobile-Dev • September 2025 - November 2025

- Developed a calendar feature displaying the current day with multiple viewing modes, including event listing and interactive event detail pop-ups.
- Built the main page UI overlay and integrated the core navigation flow between the calendar and AI chat page.
- Added key user interaction components such as file upload functionality with system file manager integration and a date picker tool.

EDUCATION

Bachelors of Computer Science

Ontario Tech University • Oshawa, Ontario • 2027

- President's List recognition for exceptional academic performance in the Fall 2021 semester.
- Dean's List recognition for high-achieving scores in the Winter 2026 semester.

INVOLVEMENT

Junior Team Programming Lead

Ontario Tech University • Ontario Tech Robotics Team • October 2022 - April 2024

- Developed and implemented autonomous robot navigation and control systems using WPILIB and Java, improving team performance in competitions.
- Mentored junior programmers on effective debugging techniques and code optimization strategies for competitive robotics.
- Orchestrated cross-functional collaboration with design and mechanical teams to integrate robot subsystems and ensure timely project completion within a three-day deadline.

SKILLS

- Multilingual communication: English (Fluent), Cantonese (Intermediate), Mandarin (Basic)

Teamwork and collaboration in fast-paced environments

Customer service and communication skills

Time management and multitasking under pressure

Problem-solving and conflict resolution

Reliable, organized, and adaptable in dynamic work settings
